Comparative gene expression analysis of genital tubercle development reveals a putative appendicular Wnt7 network for the epidermal differentiation  

One-cut-2 knockout mice fail to thrive during early postnatal period and have altered patterns of gene expression in small intestine  

Loss of Rab25 promotes the development of intestinal neoplasia in mice and is associated with human colorectal adenocarcinomas  

High-throughput detection of mutations responsible for childhood hearing loss using resequencing microarrays  
*BMC Biotechnology*, 10, art. no. 10, 2010.

Engineered human skin substitutes undergo large-scale genomic reprogramming and normal skin-like maturation after transplantation to athymic mice  

Silencing of RON receptor signaling promotes apoptosis and gemcitabine sensitivity in pancreatic cancers  

Correction: Disease candidate gene identification and prioritization using protein interaction networks  

Calcium influx is sufficient to induce muscular dystrophy through a TRPC-dependent mechanism  

Embrace diversity! Systems genetics-enabled discovery of disease networks  

Protective role of clusterin/apolipoprotein j against neointimal hyperplasia via antiproliferative effect on vascular smooth muscle cells and cytoprotective effect on endothelial cells  

Bridging the gap between systems biology and medicine  
*Genome Medicine*, 1 (9), art. no. gm88, 2009.

Analysis of early nephron patterning reveals a role for distal RV proliferation in fusion to the ureteric tip via a cap mesenchyme-derived connecting segment  

ToppGene Suite for gene list enrichment analysis and candidate gene prioritization  

Gene expression signatures in polyarticular juvenile idiopathic arthritis demonstrate disease heterogeneity and offer a molecular classification of disease subsets  

Integrative genomic analyses of neurofibromatosis tumours identify SOX9 as a biomarker and survival gene  
Subtype-specific peripheral blood gene expression profiles in recent-onset juvenile idiopathic arthritis
_Arthritis and Rheumatism_, 60 (7), pp. 2102-2112, 2009.

Inferring novel disease indications for known drugs by semantically linking drug action and disease mechanism relationships

An overview of custom array sequencing

Identification of IFRD1 as a modifier gene for cystic fibrosis lung disease

Credentialing a preclinical mouse model of alveolar rhabdomyosarcoma

Unique and overlapping gene expression patterns driven by IL-4 and IL-13 in the mouse lung

Atlas of Gene Expression in the Developing Kidney at Microanatomic Resolution
DOI:10.1016/j.devcel.2008.09.007

Caveolin-1/-/- null mammary stromal fibroblasts share characteristics with human breast cancer-associated fibroblasts

Disease candidate gene identification and prioritization using protein interaction networks
_BMC Bioinformatics_, 10, art. no. 73, 2009.

The SWI/SNF ATPase Brm is a gatekeeper of proliferative control in prostate cancer

Atlas of Gene Expression in the Developing Kidney at Microanatomic Resolution

Molecular analysis of human cancer cells infected by an oncolytic HSV-1 reveals multiple upregulated cellular genes and a role for SOCS1 in virus replication

Multiple interactions between the alpha2C- and beta1-adrenergic receptors influence heart failure survival
_BMC Medical Genetics_, 9, art. no. 93, 2008.

Loss of Rb1 in the gastrointestinal tract of Apc1638N mice promotes tumors of the cecum and proximal colon

Differential coupling of Arg- and Gly389 polymorphic forms of the β1-adrenergic receptor leads to pathogenic cardiac gene regulatory programs

Identifying disease-causal genes using Semantic Web-based representation of integrated genomic and phenomic knowledge
Shared gene expression profiles in developing heart valves and osteoblast progenitor cells

Differential coupling of Arg- and Gly389 polymorphic forms of the β1-adrenergic receptor leads to pathogenic cardiac gene regulatory programs

Clusterin expression during fetal and postnatal CNS development in mouse

Temporal gene expression profiling reveals CEBPD as a candidate regulator of brain disease in prosaposin deficient mice
*BMC Neuroscience*, 9, art. no. 76, 2008.

Clusterin increases post-ischemic damages in organotypic hippocampal slice cultures

Human breast cancer-associated fibroblasts (CAFs) show caveolin-1 downregulation and RB tumor suppressor functional inactivation: Implications for the response to hormonal therapy

Cellular expression patterns of genes upregulated in murine and human colonic neoplasms

GUDMAP: The genitourinary developmental molecular anatomy project

Activator protein-1 transcription factors are associated with progression and recurrence of prostate cancer

Dysfunctional genomics: toward an integrative biology of disease and health—application to IBDs.

Functional evolution of the p53 regulatory network through its target response elements
