

Mechatronic Systems and Control

Editor-in-Chief
 Prof. Clarence W. de Silva
 University of British Columbia, Canada
 Frequency: 4 issues per year

ISSN (Online): 2561-178X
 ISSN (Hardcopy): 2561-1771

[Editorial Board](#)

[Click here for more details about this journal](#)

Scope

This international journal publishes both theoretical and application-oriented papers on various aspects of mechatronic systems, modelling, design, conventional and intelligent control, and intelligent systems. Application areas of mechatronics may include robotics, transportation, energy systems, manufacturing, sensors, actuators, and automation. Techniques of artificial intelligence may include soft computing (fuzzy logic, neural networks, genetic algorithms/evolutionary computing, probabilistic methods, etc.). Techniques may cover frequency and time domains, linear and nonlinear systems, and deterministic and stochastic processes. Hybrid techniques of mechatronics that combine conventional and intelligent methods are also included.

2021 Prices	Hardcopy AND Online		
	Hardcopy	Online	Hardcopy AND Online
Subscription	\$950.00	\$910.00	\$1,095.00
With Agency Discount	\$855.00	\$819.00	\$985.50
Individual Articles	N/A	\$45.00	N/A

Please add \$80 for postage and handling to Canada & USA; \$125 for postage and handling to international destinations.

Indexed by

ESCI - Web of Science (NEW), EI Compindex, Inspec, Scopus, Google Scholar, EBSCO

HOW TO ORDER

By Mail

Complete and submit the [ACTA Press Order Form](#) (.pdf) to:
 ACTA Press
 200, 4040 Bowness Road NW
 Calgary, AB T3B 3R7
 Canada

Online

ACTA Press accepts online orders for journal issues, conference proceedings, and individual articles. To order publications online, visit www.actapress.com and click on “Journals” or “Proceedings.”

Online payments can be made by VISA or Master Card. Agencies should contact us first to set up an online discount.

Please make all cheques and money orders payable to ACTA Press. Cheques MUST be in US dollars and must be drawn on a Canadian or US bank. If you would like to pay by wire transfer, please contact us for more details.

International Journal of Robotics and Automation

Editor-in-Chief
Prof. Simon X. YANG
University of Guelph, Canada
Frequency: 6 issues per year

ISSN (Online): 1925-7090
ISSN (Hardcopy): 0826-8185

[Editorial Board](#)

[Click here for more details about this journal](#)

Scope

First published in 1986, the International Journal of Robotics and Automation was one of the inaugural publications in the field of robotics. This journal covers contemporary developments in theory, design, and applications focused on all areas of robotics and automation systems, including new methods of machine learning, pattern recognition, biologically inspired evolutionary algorithms, fuzzy and neural networks in robotics and automation systems, computer vision, autonomous robots, human-robot interaction, microrobotics, medical robotics, mobile robots, biomechatronic systems, assistive technology, autonomous design of robotic systems, sensors, communication, and signal processing.

2021 Prices	Hardcopy	Online	Hardcopy AND Online
Subscription	\$1,650.00	\$1,640.00	\$1,920.00
With Agency Discount	\$1,485.00	\$1,476.00	\$1,728.00
Individual Articles	N/A	\$45.00	N/A

Please add \$115 for postage and handling to Canada & USA; \$170 for postage and handling to international destinations.

International Journal of Power and Energy Systems

Frequency: 4 issues per year

ISSN (Online): 1710-2243

ISSN (Hardcopy): 1078-3466

[Editorial Board](#)

[Click here for more details about this journal](#)

Scope

First published in 1981, this journal serves a worldwide readership of power and energy professionals. The International Journal of Power and Energy Systems strives to be the first to explore emerging energy issues. Subject areas covered include power transmission, distribution and generation, power quality, education, competition and regulation, power electronics, communication, electric machinery, power engineering systems, protection, reliability and security, energy management systems and supervisory control, economics, dispatching and scheduling, energy systems modelling and simulation, alternative energy, and policy and planning. It appears four times per year
